Colorado Tech Industry Report

Why Colorado is the definitive tech hub between the coasts.

COLORADO TECHNOLOGY ASSOCIATION
COLORADO, THE TECH HUB BETWEEN THE COASTS

Natural resources and agriculture are no longer Colorado’s lone drivers. Instead, a rapid transformation of business through technology over the past five years has catalyzed a diverse ecosystem. Leadership in cybersecurity, health, aerospace, cloud, engineering and more have made this the best place to start and then grow a business. Paired with a unique work-life balance and soaring tech wages, it’s easy to see why Colorado has become the definitive tech hub between the coasts.

I’ve never been more excited for the future of Colorado tech than I am right now. Our diversity of startup and enterprise companies, fast-expanding educational opportunities and unique work-life balance have made Colorado a natural base for technology innovators, including recent expansion efforts by Google and Amazon. This is where you find top talent and build amazing products with the support of a close-knit community. The past few years have proven Colorado truly is the tech hub between the coasts, and 2017 is the year to make it known far and wide.

**Kristin Russell,** Global President of Arrow Intelligent Systems, Arrow Electronics

We are so thrilled to be driving tech solutions for the State of Colorado, because it is an opportunity to create private-public partnerships with those leaders who make up our amazing tech landscape. The innovation here, the good work we can do for Coloradans together, is possible because of the creative, organic growth of technology companies that now call Colorado home. Their expertise, combined with our professional IT teams, can move mountains and truly make a difference for the people of Colorado. I look forward to the years ahead of collaboration and community between our public and private sectors.

**Suma Nallapati,** Secretary of Technology & CIO, Governor’s Office of Information Technology - State of Colorado

Colorado’s unrivaled close-knit community is a force in technology that has caught the world’s attention. We are the definitive tech hub between the coasts thanks to a pioneering spirit embodied in our academic institutions, startups and Fortune 100 companies. This isn’t the east or west coast. What we have is uniquely ours, and it clearly resonates as companies and millennials flock to the opportunities in eclectic communities across the state. The tech community is propelling the Colorado economy forward, and we aren’t slowing down any time soon.

**Andrea Young,** President & CEO, Colorado Technology Association
